

**Taylor Technologies is not only the “Choice of Professionals” when it comes to water testing, but also when it comes to training! And effective learning starts with a talented instructor.**

We invite you to attend a **taylortraining** Certified Pool Operator (CPO®) class and see the difference for yourself. *taylortraining* is partnering with companies in your area to host a CPO program for those industry professionals who are required by local health agencies to be certified and for those professionals who understand the benefits of having the CPO certification.

For this class, Wayne Ivusich, Manager of Education and Technical Services at Taylor Technologies, is your Instructor. A 30-year veteran and recognized expert in the pool/spa industry, Wayne is a Certified Pool Operator (CPO) and a PHTA CPO Instructor. He has also been a member of the PHTA Education Committee since 2007.

**Here is some feedback from Wayne’s classes:**

***“I’ve been doing service for 22 years, and I will attend this class every year! Great Speaker!”***

***“Wayne was a great instructor! Animated and informative — great stories!”***

Upon successful completion of the 2-day (16-hour) course and the passing of the exam, students will receive their CPO certification, which is good for 5 years. Cost for the 2-day CPO class is \$350 per student. This fee includes the Pool Math™ Workbook; the Pool & Spa Operator® Handbook; a Complete™ FAS-DPD test kit (K-2006), which incorporates the titrimetric method for determining chlorine; and all registration fees.

*For more information about training, please contact Wayne Ivusich at 410-472-4340 ext. 121 or send an e-mail to [wayne@taylortechnologies.com](mailto:wayne@taylortechnologies.com).*

In conjunction with the CPO certification program, **taylortraining** also offers seminars on a variety of topics related to the pool/spa industry:

- Basic, Intermediate & Advanced Water Chemistry & Testing
- The Unique Aspects of Hot Water Chemistry & Testing
- Identifying & Overcoming Testing Interferences
- Most Common Myths of Water Chemistry & Testing
- Sanitation & Oxidation
- Water Balance 101
- Most Common Technical Questions Answered
- Testing Technologies & Techniques

*Taylor Technologies also offers webinars on the topics above. The webinars are approximately 30 minutes in length, with additional time for Q+A, beginning at 3 p.m. eastern time on the given dates. Completion of four core webinars within a round will earn you a signed Certificate of Completion. These webinars have been a valuable resource to service companies, retail stores, health departments, chemical manufacturers, homeowners, and everyone who touches pool/spa water! They are hosted by GoToWebinar which allows space for only 100 participants per webinar, so if you are interested please claim your space early.*
