

Taylor's Neutralizing Amines Test Kit

INTRODUCTION

Taylor's K-1682 is appropriate for measuring six neutralizing amines in high-purity steam and condensate.

Neutralizing amines will **prevent carbon dioxide corrosion** in steam condensate systems. **Morpholine, cyclohexylamine, diethylethanolamine, and triethanolamine** are among the neutralizing amines used to elevate condensate pH.

Levels are determined with an **acid-base titration**. Note: This test is not specific to neutralizing amines. Rather, it is a sensitive alkalinity test. For this reason, carbonates or other alkaline materials from boiler carryover or leaks in a condenser or heat exchanger can interfere. Likewise, do not use this product to detect neutralizing amines outside a condensate system.

NEUTRALIZING AMINES KIT

K-1682

Drop test (acid-base titration);
1 drop = 2.5 ppm monoethanolamine (MEA);
1 drop = 3.8 ppm methoxypropylamine (MOPA);
1 drop = 3.8 ppm morpholine (MOR);
1 drop = 4 ppm cyclohexylamine (CHA);
1 drop = 5 ppm diethylaminoethanol (DEAE)/diethylethanolamine (DEEA);
1 drop = 6 ppm triethanolamine (TEA)

Taylor's K-1682 is useful for determining concentrations of six popular corrosion inhibitors, including morpholine.

USER BENEFITS

- Titrations do not require the ability to match colors, only the ability to see the **permanent color change** at the endpoint of the reaction.
- Test kits **come complete** with all necessary reagents and equipment.
- This test kit is practical for both **on- and off-site** testing.
- **Waterproof instructions** are printed on plastic-impregnated paper that resists fading and tearing.
- Custom-molded, durable plastic cases provide **safe storage** for all tests.
- **Proven chemistries** are based on *Standard Methods for the Examination of Water and Wastewater*, APHA, Washington, DC, and/or *American Society for Testing and Materials*, ASTM, Philadelphia, PA. Some methods use proprietary chemistry developed by Taylor Technologies.

ALSO AVAILABLE

- Individual replacement reagents.
- More than 500 single-parameter and multiparameter kits covering a wide range of water-testing requirements.
- Testing supplies and kit replacement parts (e.g., burets, flasks, test tubes, and test cells).
- Many **video demonstrations** for new users posted on our website.
- Toll-free technical assistance at **800-TEST KIT**.
