INTRODUCTION

Retailers will be impressed with the look of our new **Retail Floor Display (K-1901)**. Its powder-coated aluminum frame stocks a multitude of products and houses a touchscreen display that guides your customer in choosing the right test kit (or test strip) for their needs.

Peg holes line both sides of the display for convenient hanging of additional product, and space is provided on the front of each compartment for attaching 2.5" x 1.1875" price tag labels (not included). Keeping products front and center is never a problem, thanks to the spring-like mechanism on the shelves for test strips and test kits and the slanted shelves for reagents that allow the bottles to roll forward as one is removed. Restocking is a cinch.

Details:

- Retail Floor Display dimensions: 24" w x 30" d x 72" h
- Display must be located near a power source (may be run on batteries for a short period)
