

Thank you for purchasing a TTI® Colorimeter. Taylor offers three options to house your instrument:

- A soft carrying case (part #7146), which is designed to hold the rigid foam insert included in this box. ***Keep the foam insert if you think you may order the soft case.***
- An attaché-type, hard-sided carrying case (part #9502), which can hold 12 colorimeter reagent packs (or a combination of reagent packs and drop-test reagents). It also has adjustable utility compartments to hold assorted testing supplies.
- An attaché-type, hard-sided carrying case (part #9506), which has a custom-molded insert for storing eight .75 oz. reagents, two 10-gram powder vials, two sample cells, and a pipet.

These cases are pictured on www.taylor technologies.com and may be purchased online as well; search under “Products/Accessories” using the item numbers given above. Or, call 800-TEST KIT (837-8548) to purchase any of these optional accessories.
